**Re: Amazing results from your Hydroxyl Machine**

Dear Mr Melton,

I felt compelled to drop you a quick note to let you know how impressed I am with the above machine that we had the good fortune to use recently.

I have worked in the Motor industry for over 20 years, and have never found an effective solution for any of the following smells within vehicles...

Smoke  
Perfume  
Spilt fuel

To my amazement your machine has over the last few weeks successfully eliminated all three from different vehicles, thus allowing them to confidently be sold.

Once again many thanks for this incredible solution, and I look forward to using it again soon.

Kindest regards,

Gary Neve
